

## Seriously Injured In Car Accident

Bill Carter, of Carstairs is in the Didsbury Hospital in a serious condition as the result of a car accident on Monday night about two miles north of Carstairs.

Along with Mr. and Mrs. Don Collier of Carstairs and a Calgary friend, Carter was returning from a camping trip at Pine Lake when something went wrong with the trailer which was behind the car. The men were fixing the trailer on the side of the road when a car from the north crashed into them. Carter was caught between the car and trailer while Collier was thrown to the side. They were brought to Didsbury where after treatment Collier was able to proceed home but Carter is still at the hospital in a serious condition.

Mrs. J. A. McGhee, in her capacity of grand conductress of the Grand Chapter of the Order of the Eastern Star, accompanied the grand worthy matron, Mrs. Harwood of Calgary, to the Grande Prairie Chapter last week.

## House Burns

Shortly after Tuesday midnight fire broke out in the Mat Green residence in east Didsbury and completely destroyed both building and contents.

The fire started from an unknown cause in the kitchen at the north end of the building and had got such a headway when discovered that the family barely escaped in time and it was impossible to save any of the contents.

The alarm was given by a truck man who saw the blaze while passing. When the fire brigade arrived on the scene their efforts were devoted to adjoining buildings and truck which was standing in the yard.

The building and contents were to some extent covered by insurance.

## Memorial Service Next Sunday

The Canadian Legion will hold their annual Memorial Service, in honor of those comrades who made the supreme sacrifice in the Great War, at the Butte on Sunday afternoon, September 11th, at 2:30.

All citizens of the district are invited to take part in this service. Rev. A. S. Caughell will conduct the service and deliver an address.

All returned men are invited to join with the members of the Legion in paying tribute to their fallen comrades. They are asked to meet at the Legion Hall at 2 p.m., from where they will parade to the Butte.

## Fruit Shower For Normal Students

Miss Alma Shaw and Eileen Geeson who are to attend Normal School in Calgary, were entertained to a fruit shower at the United Church basement last Friday evening. About fifty friends gathered in their honor and an evening of games etc., was thoroughly enjoyed.

The highlight of the evening came at the moment a flower-bedecked wagon loaded with cans of fruit to be presented to the girls was drawn into the room.

While at school the girls will do their own house-keeping, so the gifts were very opportune.

Rev. and Mrs. R. Mensch, of Stettler, were renewing acquaintances in the district Monday and Tuesday.

## Threshing Starts

Threshing commenced in earnest this week east of town and several machines are reported to be in action. By next week threshing machines will be heard humming in all parts of the district. All the elevators report that they are receiving grain.

Some of the earlier wheat shows evidence of being cut too green and hail damage is also in evidence in some lots. The grades are mostly going from No. 2 to No. 4.

The first grain was shipped out of Didsbury on Tuesday when two cars were shipped by the Alberta Wheat Pool.

## Deliver First Wheat.

L. E. Ferguson, who lives southeast of town, was the first to deliver wheat to the local elevators when he brought in a load of combined Garnet wheat to the Midland and Pacific elevator on Thursday, September 1.

Later the same day Mr. Jake Brown delivered the first load of wheat from a threshing machine to the Alberta Wheat Pool elevator. It was a good sample of 222 wheat and graded No. 2 Northern.

## Knox United Church Notes.

The service next Sunday will be in charge of the minister whose sermon topic will be 'For God's Sake!' A hearty invitation is extended to all.

There will be a baptismal service in connection with the evening worship and parents wishing to have their children baptised are asked to arrange for same with the minister.

## Evangelical Church Notes

In the morning the pastor will have as his subject: "Faith in Christ," and the evening theme will be "Appearance and Reality."

The afternoon service at Jutland School will be withdrawn since the pastor has been asked to speak at the memorial service at the Butte. Everyone is requested to attend this memorial service.

## Mountain View Council.

### Municipality Will Have to Maintain Abandoned Parts of Highway.

At the meeting of the Mountain View Council held at Olds on Saturday it was decided to request the Department of Public Works to renew the bridges at the following points: West of N.E. of 22 and east of N.E. 14 in 31-27-4; and east of S.E. of 12-32-29 and S.W. of 13 33 29 w4.

A letter was read from the Dept. of Public Works notifying the council that in future the municipality would be responsible for the maintenance of the portions of the highway which had been abandoned as a result of the construction of the new highway.

Communications were read regarding relief which pointed out that with the advent of the improved crop conditions, the government did not anticipate the need of any direct relief in the municipality and also pointed out that a careful check should be made before any relief was granted. It was intimated that the government's share of direct relief would not exceed 60 per cent.

The secretary reported that the municipality's share in the cost of grasshopper bait had amounted to \$65.26.

Adjutant Hill, of Salvation Army appeared before the council and asked for a grant towards the social work of the Army. He pointed out that several charges of the municipality were being covered in the Army homes. A by-law passed making a grant of \$200.00 as in previous years.

It was reported that two certificates had been granted under the Farmer's Credit Arrangement Act. One application for old age pension was approved.

## Anglo-Canadian Well Drilling For Gas

In a report from the Albertan we learn that it is definite that the Anglo-Canadian Co. drilling near Sundre, is on location for a new source of natural gas to supply the Canadian Western Natural Gas, Light, Heat and Power Co. The necessity for new fields of gas is amply proved, when some companies in Turner Valley installed pumps to keep the pressure up.

## Great Historical Drama Here September 14th.

A picture of particular interest to school children, and history students will be presented on Wednesday, September 14th, when "Victoria the Great" is brought to the screen at Didsbury Opera House. Movie patrons are asked to please note this special date, Wednesday, Sept. 14th.

Proudly the screen presents its greatest historical drama. The true story of a romance and a reign that saw the birth of the world's vastest empire. Withheld from stage and screen for decades, now it can be told. And here it is in flaming passages torn from the burning pages of the queen's own diaries—the romantic record of Victoria and her fiery Prince Consort.

"Victoria the Great" embodies the greatest panoply of empire ever screened. Filmed in the actual cities and palaces where the girl Queen's love affair shook the powers of church and state as the British Lion roared. Many of its scenes are of speechless grandeur in wondrous Technicolor.

To people who seldom go to the movies, here is your picture. Drama more thrilling than fiction, hurled to the screen from the biographical record of a woman who stands alone among the great of the world.

The notable cast of "Victoria the Great" stars Anna Neagle and Anton Walbrook, with H. B. Warner and Walter Rilla in prominent supporting roles.

## PAULINE'S Beauty Shop

I wish to announce that I have just returned from Vancouver, where I have been studying the latest course in Cosmetology.

Since taking the course I am now able to use the very best of oil solutions for all my permanents with no change in prices.

I also have the latest equipment for permanent waving long hair and the Latest Method in Hair Styling and Cutting.

## The Grasshopper Menace

Coming from a man of his knowledge and practical experience of agricultural practices and pursuits the recent published statement of Hon. W. R. Motherwell in Regina to the general effect that man can do comparatively little to cope with grasshopper infestations and that in this respect Nature must be allowed to deal with such insect visitations in her own way and in her own good time must have caused some disquietude among farmers of the prairie provinces.

Among other things, the viewpoint expressed by the former Federal Minister of Agriculture, is destined to raise the question in the minds of a good many whether the large sums which have been spent in recent years in poison bait campaigns has been money wasted, and in the second place is likely to discourage further efforts to control the pests in future years.

On the question of the degree of efficacy of control measures there are admittedly differences of opinion, not only among the farmers themselves but between experts and technicians who advise on such matters.

There is plenty of evidence, scientific and practical, however, that in the past few years millions of grasshoppers have been killed as the result of application of control measures, both cultural and by the use of poison bait, and particularly where measures have been taken at the precisely appropriate time and conducted in strict accordance with the recommendations of the authorities. It is only reasonable to assume, no matter how severe the infestation of the ensuing crop and the extent of the damage that was done to it, that the loss would have been greater had these measures not been taken, for dead grasshoppers cannot reproduce.

### Losses Are Serious

The problem may not appear so momentous just now to the people of Alberta and Manitoba as it does to thousands of farmers in a large area of Saskatchewan who have recently seen fine crops partially, and in some cases almost entirely, ruined by an influx of great hordes of ravenous grasshoppers on the eve of harvest.

It is not necessary to dwell on the anguish caused to farmers who had a good crop almost within their grasp after years of impoverishment, by these overnight invasions of millions of insect pests, but it might not be amiss to point out that farmers in Manitoba and Alberta have had sufficient experience with grasshoppers within the past decade, to realize that peril lurks for them, as well as for their Saskatchewan colleagues, next year if Saskatchewan is to be a nursery for a 1939 crop of 'hoppers, perhaps of even greater magnitude.

The sudden blow dealt to a large number of Saskatchewan farmers this fall may be repeated next year and may be the lot of farmers in either or both of the sister prairie provinces in the autumn or late summer of 1939, if nothing can be done by human agency to mitigate or prevent it.

Early this spring a provincial government map was published demonstrating that severe infestation from Saskatchewan bred 'hoppers was to be expected in that province in only two or three relatively small areas, based on an egg count conducted by agricultural authorities. If their diagnosis was correct the invasion of Saskatchewan fields this fall must have had its origin outside the province and this appears to be borne out by evidence of observers on both sides of the international boundary. In other words, there is some reason to believe that some of the loss, perhaps the major part of it, to Saskatchewan farmers occasioned by grasshoppers this fall had its origin in some of the neighboring States.

### An International Problem

If grasshoppers can travel the considerable distances in the comparatively short time indicated by this evidence the problem is not confined to the district or the province immediately infested but becomes one of extra-provincial and international scope, and if anything can be done by human agency to curtail the peril it can only be effectively done by joint action of the authorities and all the people within the danger zone irrespective of political boundary lines.

The situation at least presages the advisability of a round table conference between the authorities, technical experts and practical farmer-leaders of the Canadian provinces and American States subject to this danger with the object of devising control measures on as wide a scale as may be necessary, if it should be decided that control measures can produce results within the range of economic feasibility.

If such a conference agrees that effective control measures can be taken, a co-ordinated educational program should be mapped out and undertaken among the farmers of the entire territory affected and consideration should also be given to the advisability of passing legislation to make the approved measures effective in all the states and provinces subject to infestation.

The cotton boll weevil came to the United States from Mexico.

A large airplane factory will be established in Hsinking, Manchuria.

Dwarf Shetland ponies are now popular as pets in England.

### How To Get A Post Office

Disney, boom town of 1,000 on the Grand River damsite in Oklahoma, wanted a post office, so civic-minded residents wrote thousands of letters in answer to newspaper and magazine advertisements. Soon the mail carrier was staggering under piles of "literature," and Disney got a post office.

"Tim," London's automatic telephone time announcer, is being rung up an average of 340,000 times a week. 2269

### Will Make Survey

#### Dominion Bureau Of Statistics Wants Figures On Living Expenses

The first Dominion-wide survey of nutrition and family living expenditures will begin shortly. The survey, instituted by Hon. W. D. Euler, minister of trade and commerce, will be carried out by the Dominion bureau of statistics.

The branch hopes to obtain records of the manner in which family income is spent in urban areas, including a high proportion of the country's wage-earning population. A statement issued under Mr. Euler's authority said:

"Besides furnishing a basis of comparing living standards in Canada with those in many other countries for which surveys recently have been made, these records will provide invaluable information concerning conditions of nutrition.

"They will also make it possible to measure changes in living costs much more accurately and to estimate differences in family budgets according to regional areas. Such data form a necessary basis for adjustments in wage scales of industrial workers.

"The survey is to be made in September and October and because of the difficulties in obtaining such data on a comprehensive scale, only a sample of wage-earning families will be canvassed.

"Those who contribute careful expense accounts would contribute materially to the success of the survey and at the same time perform a service to their community by indicating to the Dominion bureau of statistics, Ottawa, their willingness to co-operate.

"The cities to be included in the survey are Charlottetown, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. These centres have been chosen after examining the most recent census records carefully to assure a representative selection."

### China Outbuys Japan

#### Has Been Heaviest Purchaser Of War Materials In Canada

Spokesmen for the Department of External Affairs, in close touch with the Sino-Japanese war, described as "a cock and bull story" report from China that Japan intended making large purchase of munitions in Canada.

"Canadian manufacturers have no facilities for the immediate production of munitions on a large scale," it was stated. "And it is doubted whether Japan has any surplus gold or credits to be spent on foreign purchases."

To date no country has restricted the shipment of arms to either China or Japan and Canada will not likely do so until one of the major powers declares an embargo.

Since the war started, China has been the heaviest purchaser of war materials in Canada. The Chinese Government has bought a number of planes here for training purposes, while Japan has purchased only one plane, ordered before the war.

There have been shipments of lead, zinc, copper and nickel to both countries, but the bulk of the shipments have gone to China.

### His First Assignment

#### Reporter Took No Chances On Truth Of His Story

The young reporter who had just joined the staff of the local paper received an awful warning on the dangers and appalling consequences of making ill-founded statements in print. With this fresh in his mind he set off on his first job to report the sale of work which was being held in a nearby village.

Pale but triumphant he returned, and handed his first copy to the editor. "The bazaar", it read, "was opened (so it is said) by Mrs. Brown, alleged to be the wife of Councillor Brown, commonly supposed to be a more or less highly-esteemed tradesman of this town. She was dressed in what some would describe as fashionable attire, and was supported on the platform by the so-called vicar and other reputed ladies and gentlemen."

The musk ox is more closely related to sheep than to oxen. It is related to both the cattle and sheep groups, but the relationship is not close on either side.

**2 EXTRA**  
**CORD PLYS**  
under the tread  
**AT NO EXTRA COST**

Extra values at no extra cost . . . that is your positive guarantee when you buy Firestone Tires. Among these are Firestone's 2 Extra Cord Plys under the tread that bind the tread and body into an elastic inseparable unit making it safe at any speed. You pay nothing for this extra feature that gives you extra safety and extra mileage.

Get the most for your money. Firestone Tires do not cost one cent more than ordinary tires. Have the nearest Firestone Dealer replace worn tires today. Specify Firestone tires as original equipment when buying a new car.

### LOW PRICED TIRES

No matter how little you can afford for tires go to the Firestone Dealer first. He has a genuine Firestone tire to suit every purse that will give you the safest lowest cost mileage.

### SELECTED RECIPES

#### CUCUMBER PINEAPPLE SALAD

1 package Lime Jell-O  
1 pint hot water  
1 slice canned pineapple, cut in wedges  
1 cup diced cucumber  
Dissolve Jell-O in hot water. Arrange pineapple wedges in bottom of mold. Pour on Jell-O, being careful not to disarrange pineapple. Add cucumber. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 6.

#### HORSE-RADISH RELISH

1 package Lemon Jell-O  
1 cup hot water  
1 tablespoon vinegar  
1/4 teaspoon salt  
1/2 cup drained horse radish  
1 cup cream, whipped  
Dissolve Jell-O in hot water. Add vinegar and salt. Chill. When slightly thickened, fold in horse-radish and cream. Mold. Serve with baked ham. Serves 10.

### Will Pierce Through Fog

#### Radio Lights Aid Pilots When Ground Is Obscured

Radio lights, a new method of seeing through miles of the thickest fog or clouds, were announced at Purdue University, Lafayette, Indiana.

The lights are planned to enable a pilot to "see" the runway of a field miles away, and to land on that strip no matter how completely the ground is obscured. They are under development for aeronautics by R. H. George and H. J. Heim, of the engineering experiment station.

### An East African Theory

#### Birds Seeking Nesting Sites When They Tap On Window

The discussion of the mystery why birds (including rooks, warblers, wagtails and sparrows) will on occasion tap on the windows of our houses has brought a conjecture from East Africa. It seems that the habit is more usual there than in England; and it is supposed that the birds are seeking nesting sites.

It is, I think, true that the tapping is more commonly heard in Spring; but the explanation does not sound very convincing. Perhaps there are many causes; the reflection of the bird in the glass may be one; the perception of flies on the inside of the pane another. On this latter point my dog cannot pass the glass-paned door of a certain summer-house without stopping and casting a puzzled look at the faint effigy in the glass.

One correspondent, both puzzled and annoyed by the regular early morning hammering of a rook on the mortar just below the window came to the conviction that the bird was mad; and dogs are not the only animals that go mad. Hens certainly lose at times the few wits they possess.—London Spectator.

### Peculiar Timber

A kind of hardwood timber, found only in North Queensland, Australia, will burn as well when it's wet as when it's dry. In fact, when a wet stick is ignited, the water is expelled as steam from the stick's end.

**Rugby Notes**

With an attendance of 18 members the W.I. meeting was held at the home of Mrs. A. Hogg. It was decided to raffle a quilt at the October meeting, also to postpone the four sack contest till November, when the contest articles will be auctioned off. After the business of the day was finished, Mrs. Parker gave a most interesting account of "Kitchens From Many Lands," and we visited Holland, Spain, England, France, a colonial kitchen and grandmother's kitchen too, and we saw some very quaint and also some very beautiful things in the course of our journey. The October meeting will be held at the Hoegood home.

**Cyclists in Trouble**

Seventeen summonses went out to youths in the city this morning from police headquarters for infractions of the V. and H.T. act.

Police have decided to make a drive on bicycle riders who disobey the law, and a close check will be started immediately.—Calgary Herald.

It is apparent that the youths of Didsbury need the same treatment as frequent warnings do not seem to have effect.

**Navy League of Canada Does Valuable Work.**

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the Merchant Marine and their dependents; maintaining Sailors' Homes and Institutes in the leading Canadian ports from coast to coast, and looking after the welfare of seamen when ashore; training boys and young men and helping to make better Canadian citizens of them, the citizens of Didsbury subscribed \$10.00 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta Division, 1107, 15th Avenue West, Calgary.

**The World of Wheat**  
By H. G. L. STRANGE

The prairies can still produce wheat in abundance! Normal rains this year fell almost everywhere; and wherever good rains occurred, average yields appeared, even in the drought and soil-blown areas.

Rust, after 5,000 years of effort, at last we believe and hope, has been conquered. Production, therefore, it seems safe to say, on the average, over a term of years.

Now, however, for the first time in 61 years, a much more serious problem raises its head. Can we sell the wheat we produce?

Mr. Broomhall estimates that we will come far short this year of selling our surplus. Yet our very economic existence in the west depends upon selling all the wheat we normally grow. To induce world buyers to purchase all we are producing, I am forced to conclude, we must try for two things:

First to improve the quality of our wheat; and secondly for all of us together to strive unceasingly to persuade the Dominion Government to reduce tariffs, all so that foreign people can sell more of their own goods in Canada, and by this obtain more Canadian dollars.

With more Canadian dollars, these foreign people would be able to buy more Canadian and other wheat, which, authorities tell us, their undernourished people badly need.

Following factors have tended to raise price: Ominous military and naval manoeuvres in Europe -- Indian wheat shipments diminishing -- Russian southern winter wheat yields disappointing -- Italy buys Hungarian wheat -- Germany continues to import large quantities of wheat and corn -- Italian corn deteriorating -- Egyptian wheat crop smaller than last year.

Following factors have tended to lower price: Canadian spring wheat estimates show increase -- Needed rains occur in Argentina -- Harvesting under way in Germany, good production expected -- Corn crop improves, coffee crop favorable and wheat crop good in Kenya, East Africa -- British Pound continues to decline on the Canadian and U.S. Dollar -- Poland and Russia making cheap rye offers.

**Minerals For Growing Pigs**

All Yorkshire pigs on Advanced Registry feeding test at the Scott Experimental Station during the summer of 1937 averaged 210 lbs. in 165 days from birth with an average grain requirement of 333 lbs. per 100 lbs. gain, states E. Van Nice, Assistant Superintendent.

Such rapid gains not only denote that the pigs are from thrifty families but it also indicates that the ration was well balanced for maximum growth requirements.

In repeated feeding trials at the Scott Station it has been found that protein supplements such as milk or tankage and mineral supplements particularly those containing lime and salt, help the pig to make better use of the grain and reach market weight at a lower cost of feed.

In 1937 a mineral test was made without the use of tankage or milk. Two lots of eight pigs each were fed the same meal ration, but one lot was given access to a self-feeder containing a mineral mixture composed of 1 lb. sulphur, 5 lbs. hydrated lime, 20 lbs. salt and 75 lbs. fine soft coal.

Several pigs in the lot getting no minerals became unthrifty and lame. After the close of the test the mineral mixture was provided to the second lot and resulted in a marked improvement in physical condition and growth.

With the total meal mixture for both lots of pigs calculated at 1 cent per lb., the 257 lbs. of minerals consumed from the self-feeder had an actual value of \$1.85 per hundred, which was over twice the actual cost. Milk or tankage at a normal cost usually more than pays for itself in extra gains produced, and when used makes mineral mixtures less valuable, but when milk or tankage is not available the simple mineral mixture mentioned above can be supplied at little cost and the owner will be more than repaid.

However, for a pig to make use of minerals consumed, vitamin "D" is required, which is obtained from direct sunshine, cod liver oil or pilchard oil. These oils are particularly valuable in winter feeding or when pigs are denied sunshine. Either may be used at the rate of 1 ounce per pig daily. These valuable oils leave a fishy flavor in the pork unless discontinued about 6 weeks before slaughtering for pork.

## WORLD HAPPENINGS BRIEFLY TOLD

The opposing sides in Spain have accepted a three-man British commission to mediate an exchange of prisoners.

Since her maiden voyage in June, 1935, the French liner Normandie has crossed the Atlantic more than 100 times and carried 230,137 people.

The record round-trip flight to New York by the German airliner Brandenburg may be followed soon by a round-the-world flight.

The death of John Masterson, 78-year-old uncle of Lord Tweedsmuir, governor-general of Canada, has been announced. He died recently at Broughton, Peebles, Scotland.

Due to a wartime scarcity of leather, Japanese bicycle riders have received permission to wear wooden clogs while riding, a practice formerly strictly forbidden as dangerous.

One of the oldest women in Nova Scotia, Mrs. Margaret Mackenzie of Westville, celebrated her 106th birthday at the home of her son, Dan Mackenzie.

Anthony Eden, former foreign secretary, will be the principal speaker at the annual meeting of the Peace Society at the Guildhall, October 18, it was announced.

The United States treasury announced the seizure of a Brooklyn pier of the largest single shipment of illicit opium in more than a decade. Officials said the quantity seized was worth about \$600,000.

Prime Minister Mackenzie King, who has been busy at his official duties in Ottawa throughout the summer, faces an equally busy autumn and will delay his proposed visit to western Canada until October at the earliest.

### Extols Virtue Of Honey

New York Doctor Considers It Most Valuable Food

Honey is "Nature's own sweet, untouched by human art," according to Dr. Bogod Beck, writing in his book, "Honey and Health."

"Honey and other simple and natural sugars, like that in dates, figs, raisins, etc., are live physiological sugars which contain the germs of life, while industrial sugars are anti-physiological, dead, or, as a matter of fact, murdered sweets," he writes.

Pursuing this line of thought, Dr. Beck deems honey in hot water better than alcohol as a quick pickup; he says that the ancient Greek athletes wisely used it before entering the arena; that it prolongs life, being responsible for Anacron's living to the age of 115, Pythagoras to 90, and probably for the long life of Moses and Methuselah, while Thomas Parr, who died in 1635, at the age of 152, was devoted to a honey drink known as metheglin.

It is a good expectorant, according to Hippocrates; a diuretic, according to the Koran; an aphrodisiac, according to Norman Douglas; an anti-rheumatic, according to Dr. Beck's correspondent, J. L. McD., of Marion, Ind.; an anti-diabetic, according to Dr. A. V. Davidov, of Russia; a bactericide, according to Chinese and the Hindus, and a New York State subscribes to the American Bee Journal; it is also an excellent preservative and one of the finest cosmetics. And the date is the only edible substance which surpasses honey in calories.

### Had Celebrities For Clients

Man Who Built Huge Candle For Caruso Is Dead

Antonio Ajello, 78, one of the world's leading candlemakers, whose clients included Enrico Caruso, Col. Chas. Lindbergh, Mussolini and Mrs. Franklin D. Roosevelt, is dead. In his New York workshops were preserved many of the craft secrets of the medieval guilds, including the arts of timing candles, perfuming them, and sculpturing them. He came here from Italy at the age of two. When Caruso died he built a candle, 18 feet high, five feet in circumference. It cost \$3,700 and it burned a year in a church in Pompeii.

Comes news of a college professor who quit teaching European history and went into retirement. He couldn't keep up with it.

### Seems Quiet Enough

American Writer Found No War Scare In London

This story by Ernest L. Meyer appeared in the New York Post:

I arrived in London under a misapprehension. Judging from the war scare stories printed in the American press this year, I imagined that every man, woman and baby in this metropolis walked the streets in gas masks and anxiously inquired of the traffic policeman the road to the nearest bombproof shelter.

In my two days in London I have seen no gas masks and no refuge from air bombs, though I understand a model bomb and gas-proof shelter is being exhibited somewhere, mostly, I suspect, for the benefit of tourists and for an admission fee. Because the British have a habit of exacting admission fees for all sort of points of interest from the chapel in Westminster to the historic tavern where Dr. Johnson splashed his west-kilt with a schooner of sack.

Now I have wandered about considerably in London and talked to sundry citizens ranging from college professors to taxi drivers, and nowhere have I found evidence that the average London resident is living in a state of jitters with one eye turned to the zenith in search of a Zepelin.

In fact, the average male from Piccadilly to points east and west walks the streets briskly and confidently with apparently no object in life except to prove to foreigners that an Englishman can wear a bowler and swing a tightly-rolled umbrella and still look like the backbone of an Empire.

### Quite Forgotten

Man Who Stops Advertising Is Like This College Professor

A superannuated Toronto University professor went to Europe for a year immediately after his release—this after 40 years with the University. When he returned, he went to Hart House to luncheon, and fully expected that his old professional associates would greet him as the Prodigal Son was greeted by his father. But, with a single exception, all the men present paid not a particular of attention to the returned professor. One man saw how the old professor was hurt by the non-welcome, and had the grace to make a small fuss over him.

As I listened to this tale I thought of how an advertiser who quits advertising is unmissed—of how promptly the public forgets, of how unperceived is the return of a long-absent advertiser. An advertiser can keep himself in the public's eye and favor only by persistent advertising. Let him quit advertising, and the public forgets him as quickly as it forgets the dead.—J. C. K., in Marketing.

### An Insulin Herb

Old Indian Remedy Being Investigated By Doctors

Possibility of a new source of insulin, obviating the necessity of hypodermic injections for diabetes, is seen in the experiments of Dr. R. G. Large and Dr. H. N. Brockleby of Prince Rupert, B.C., with an old Indian herb remedy. The experiments are reported in the Canadian Medical Association Journal and deal with the roots of "devil's club," a shrub that grows wild on the Pacific coast. Made by boiling bark from the plant roots, the extract, taken through the mouth, has given remarkable results in reducing sugar in the blood of diabetic rabbits, the article said. The doctors' attention was drawn to the remedy through use of it by a patient, with apparently good results.—Brandon Sun.

### New Type Ice-Breaker

A pumping machine in the shape of a railroad car, travelling on wheels, has been invented in Russia to cut ice. The machine is 6½ feet deep, with a strong jet of water. It is designed to facilitate shipping in the Arctic by aiding icebreakers, which are damaged when they try to smash through ice more than 3.22 feet thick.

Thirty-four per cent. of the world's copper resources are in Chile. The United States has about 20 per cent.

The phororhacos, an extinct Patagonian bird, had a skull as large as that of a horse.

### MAKE AN ENTICING NEW STYLE

By Anne Adams

A perfect "runabout" dress for Fall—this softly feminine shirt-waister with a swing skirt! You're certain to look your most youthful and debonaire self in Anne Adams' Pattern 4918, and what fun you're going to have stitching it up! Notice how ornamental a regiment of buttons and a dear little pocket are—or you might leave off the buttons and have a slide closing all the way down the front. It'll be THE dress in your new wardrobe for everything from lunch "dates" to informal evening bridges. (College and business girls will especially love it!) Don't forget that the Sewing Instructor makes it "easy as pie" to sew both long and short sleeve versions.

Pattern 4918 is available in misses' and women's sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Size 16 takes 3½ yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

### Chance For Inventors

One Of The Crying Needs Is A Self-Cleaning Sieve

The sieve is an implement of basic importance. No kitchen is without one. Its uses are manifold. And every time it is used it has to be washed. And every time some one tries to clean an ordinary household sieve, that some one is pushed another step toward the madhouse. Is there any task more baffling, more maddening, than that of trying to clean a sieve? I think not, says John O'Ren in an article in the Baltimore Sun.

So, while applauding the ingenuity which has brought forth the head rest for bathtub readers, nevertheless I hold back the greater part of my enthusiasm for the person who invents a self-cleaning kitchen sieve.

### The World's Great Need

Is Enlightened Leadership Which Today's Youth Must Furnish

If there is one commodity in which the world is short today, it is enlightened leadership, states the Rotarian Magazine. The need is written in every new day's headlines. As men and citizens we should be looking ahead to preparing enlightened leadership for tomorrow. And from whence will it come if not from the ranks of healthy, normal boys, the sons of good parents, the products of the hard-won advantages of our civilization?

### Farmer Was Surprised

Tempted by a field of ripe corn, a tourist passing through Gilead, Ont., recently stopped and picked a few ears. The farmer, passing a few hours later, was surprised to see an envelope tacked to a fence post. Still more surprised was he when he opened the envelope, and found it contained a dollar bill and a note reading, "Thanks for the corn."

### New Sun Dial

Vancouver Man Devises Method To Prevent Lapse Of Time

Sun dials, which were in use as time markers far back in ancient days, are still studied by modern man, and in use in modern countries.

N. D. Blagdon Phillips, Vancouver, has devised a sun dial which keeps mean time, which is now on the grounds of a dairy farm near Vancouver. It is of the most simple construction, and Mr. Phillips says that one can be made and installed for a few dollars.

It is explained that the ordinary sun dial and the clock only agree exactly four times a year. The sun dial, now going a little slower, now a little faster, will be sometimes behind and sometimes before the clock, the greatest accumulated time being about sixteen minutes in November.

Mr. Phillips' dial keeps meantime all the year round, without needing any alterations or readjustments, and it has no moving parts. When plotted for a certain latitude, it may be used anywhere on, or near to that latitude, either in the north or south hemisphere, and only a watch and a level are needed for setting it up.

A further interesting feature is that it can show the date, or the seasons. These functions are accomplished by Mr. Phillips having used the apex of a triangular gnomon for his indicating shadow. The hours are marked out in the figure of "8", colored red and black. The red half of the "eight" is used for the first half of the year, and the black is ignored; and vice versa for the second half. The face of the dial is curved in order to "catch" the shadow of the apex at the early and late hours of the day.

### Opinion Worth Heeding

Swing Music Harmful To Good Taste States Authority

Whenever one perceives sneers or hears derogatory remarks directed against young people gyrating to swing music, the usual response is to say, "Ah, well, let the kids have their fun. It's harmless." But we are not so sure of our position, now that the highest authority in the dance world has spoken. Swing is harmful and degenerate, says Donald Grant, president of the Dancing Teachers Business Association, at the annual convention of the organization in New York. There is no question here of morals; the harm is to good taste, grace and poise, and the degeneration has to do with style.

Because of the great influence he wields, the dance masters' chief executive should be heard with respect.—Buffalo Courier-Express.

### Good Weather Prophets

Work Of Beavers Will Indicate Wet Or Dry Years

There will be plenty of rain in 1939, according to the beavers.

Beavers in streams near Stanford, Montana, have been observed building new dams and repairing old ones, indicating their expectation of plenty of water.

As weather prophets, beavers are regarded highly. Each winter preceding a drouth year, they were observed to have abandoned dams in the lesser streams.

### Poor Beggar Woman

Police Matron Finds \$28,000 In Her Skirt

A little woman in a tattered brown sweater and billowy black skirt stood on a busy downtown street corner in Philadelphia, pleading for alms.

A police matron searched her clothing, finding coins and bills carefully stitched in her skirt. The poor beggar woman had \$2,893.36—the 36 cents clenched tightly in her fist.

### Entombed For Centuries

Skeletons of six sacred bulls worshipped by ancient Egyptians have been discovered in Sharkia Province of Lower Egypt, the Government Antiquities Department announced at Cairo. Some of the skeletons were said to have remained intact despite centuries of entombment.

Isn't it astonishing how many fellows go to the bad in a vain endeavor to prove themselves good fellows.

### Duty Of A Newspaper

Is To Protest Against Wrongs States Vancouver Editor

W. L. MacTavish, editor of the Vancouver Daily Province, told the annual convention of the Canadian Weekly Newspaper Association that it was the business of editors to see there was no shadow of truth in the radical's sneer at the "capitalistic press."

MacTavish said that newspapers upheld capitalism out of the conviction that it was the most satisfactory economic system yet evolved in the present state of the world's progress and added:

"But let it never be said of us that we have lost the power of protest against the abuses of capitalism and have forgotten its weaknesses and ceased to fight against its injustice and inequalities."

The struggle of the free press was fought largely for the freedom to speak out the wrongs and woes of the underprivileged, he said.

"Journalism is a profession of protest. It is our calling to search out that which calls for protest in the conditions of our world and to voice that protest on behalf of those who are otherwise voiceless," he said.

Most of the world's progress was due to the successful outcome of that struggle, he said. "The great men of our calling have left us with a heritage in the form of a record of usefulness in the service of humanity."

"I think that perhaps the greatest danger confronting journalism is that in achieving a degree of material success we will lose the crusading spirit which is the hallmark of worthy journalism."

Mr. MacTavish told delegates they could find scope for crusading "in your own town, your own province and your own Dominion."

Newspapers in many countries of the world are not newspapers in the true sense of the word because they are under such rigid control, MacTavish said.

### Sound Not Transmitted

Impossible To Hear Northern Lights Opinion Of Scientist

If you see the northern lights some night and think you hear them singing, it may be only the blood rushing through your ears. The Smithsonian Institution said in publishing a report by Dr. A. S. Eve of McGill University that many reputable witnesses have reported the illusion of "hearing" the lights. This is impossible, Dr. Eve added, because the lights occur 60 miles above the earth's surface where there is virtually no air to transmit sound waves. He said the observers might have heard the blood in their heads, the wind whistling through the rigging of their ships, or "the tinkling of the ice of their frozen breaths."

### Will Take Some Planning

"In another twenty or thirty years," says Frank Morrison, secretary of the American Federation of Labor, "I anticipate an average working week of 21 hours for all labor and a substantial increase in all wages." And then future generations can look forward to a workless week with still higher wages.

A British scientist says that there are probably only a few thousand gorillas left alive to-day in Africa.

England and Wales have 5,600,000 female workers, according to records.

## POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • • • W.N.U. SERVICE

### CHAPTER III.—Continued

Sergeant Terry began asking questions.

"You came here on the same train with her, didn't you?"

"Well, I guess I did. If it's the girl I'm thinking of," said Annie.

"She isn't one of your outfit?"

"Mine?" Annie snorted. "No sir!"

"What did she say she was going to do up here?"

Annie bristled.

"Start a little store, of course."

"They all start stores. Or a beauty shop. Or work for somebody," the sergeant replied, in a voice mildly cynical.

"Who are you talking about?" queried Hammond.

"A girl named Jeanne Towers. Been working over at the Cafe de Paris."

"Anything wrong with her?"

Annie stiffened, with a queer air of protective ferocity.

"No, there ain't anything wrong with her. Why don't you let the girl go through? She ain't done nothin' to nobody!"

The sergeant laughed.

"Take it easy, Annie," he said.

"I am not accusing her. I'm just trying to get a line on her—it's a long way to the Stikine."

"Suppose it is?"

"You wouldn't want me to let somebody go in there that wasn't equipped?"

"What do you mean equipped?"

"Didn't she borrow clothes from you when you got off the train?"

Around the World Annie shot a daggerlike glance at Hammond. His eyes signalled swiftly—that he had told nothing.

"Where'd you get that?" she asked the policeman.

"Oh, some of the men told me—fellows who were standing around."

"A lot of business it is of theirs. Now listen—you can ask these girls. Now listen—you can ask these girls. I never saw the darn girl before in my life. I got to talkin' to her. She told me she'd lost her pack sack. I had some extra duds. She bought 'em and paid me for 'em. Anything wrong with that?"

"Nothing at all," he said. "I just wanted to be sure the girl wasn't taking chances."

He rose then and stooped through the entrance. Hammond started from the stove, halting momentarily at the look in Around the World Annie's eyes. Signalled, he moved close to her.

"Listen, the poor little dame's down on her luck," she whispered. "I don't know what about. Get her through."

"Coming, Jack?" called the sergeant from outside. In answer, Hammond moved through the crackling flap and joined the mounted policeman. They went on, along an icy trail.

"What's this girl's name again?" Hammond asked.

"Jeanne Towers—I think it's assumed."

"Why?"

"Oh—" he gestured with thick mittens; an unspoken explanation of police intuition. Then, "Know her?"

"I think so. Nice-looking girl. Sort of chestnut hair; hazel-brown eyes, if I remember right—"

"Trim built—that's the one. Too intelligent looking to be working as a hasher."

"Oh, yes, you mentioned the Cafe de Paris."

"I'm still not satisfied about her. Somebody told me she'd begged this clothing."

"No," lied Hammond, for no reason that he could find. "She bought it. I happened to be there; I saw some money change hands."

They walked on through the dusk, broken by the assorted howling of a thousand dogs.

"It's not that I want to turn anybody back," the sergeant said. "But, dammit, these fool girls get into some kind of a jam and think they can find a way out in a gold rush. It's the end of a lot of them."

At last they were in the sergeant's tent. Lights had appeared now, gleaming dully through the glazed abodes and outlining the dogs, heads up, necks extended, as they shrieked their greetings to the early night.

"To-morrow this'll all be gone," the policeman mused. "And another town growing up in its place."

"That's gold," said Hammond.

"Yeh—gold! I've seen it a hundred times. Following the rainbow."

"I've done it enough," answered Hammond seriously. "But this time—"

"Yeh, I know." Again he was silent. The camp was a living picture now, shadows moving about in the tents, busy at the stuffing of pack sacks, restringing of snowshoes, the last repair of dog harness. "Look at 'em—all of 'em going to stake out a million, or make it off of somebody else who has staked it out—"

Suddenly he shifted, and pawing into a pocket, pulled out his pipe. "Hammond, I'll be busy to-night checking off some turnbacks. About twenty of them—a few tin horns, weaklings, women who weren't smart enough to have a good alibi . . ."

"All right. What's my job?"

"I can't go to the station to meet the night train. This girl, Towers, says she's got supplies coming in. If not—see what you can do about talking her out of going up in that country. She looks like a nice kid."

Hammond pulled on his parka.

"I'll check up on it," he said.

But he looked vainly for her, as the train rumbled in, discharging its crates of dogs, another cargo of gold seekers, boxes and cartons of supplies and baskets of bread. At last Hammond started back to his tent.

The night had cleared. Stars were out. From the east and west, great, feathered shafts of the multi-colored Northern lights shot across the sky in eccentric breaks of illumination. At last Hammond halted. Once before, he thought he had heard the crunch of mocassins on the icy trail. With an impulse, Hammond began to back track. Then he stopped.

"Why have you been following me?" he asked.

Jeanne Towers spoke slowly.

"I wasn't exactly following you."

"You stopped when I stopped."

"Yes—I did."

"Why?"

"Well—I wanted to talk to you. I walked behind you all the way down to the station."

Hammond laughed.

"That's funny. I was looking for you down there. Sergeant Terry asked me to find out about your supplies."

The girl looked up at the gleaming, iridescent sky. She seemed

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using healthful Wrigley's Gum daily—as millions do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today. cs:34

struggling for words that would not come. At last she said bleakly:

"I might as well tell you. I didn't have any supplies coming in."

"Did you follow me to tell me that?"

"No—I was just taking a chance. That you'd help me."

"Help you?" Suddenly he said with sympathetic brusqueness, "Why don't you help yourself. Go back home."

She shook her head. "I can't."

There was a pause. Then, "Does Mr. Barstow know that you came up here?" Her slight exclamation and quickly turned face formed the only answer. "Remember?" Hammond asked. "I met you on the stairs; going up to his office."

The girl raised a mittened hand, rubbing at the fur which shielded her throat.

"I—I remember." Then quickly, "He didn't talk to you about me?"

Down at the station, the train finished the unloading of its cargo, human and material. Now, with a shaft of light splashing the snow and a glow of red from the firebox contrasting with the green gleam of the Northern lights, it rushed away, the howling of camp dogs forming an obligate for the bark of the engine stack.

"No, Barstow didn't say anything," He added quickly, "I didn't ask him. None of my business."

"Thank you," she said simply. "He promised not to tell anybody."

There was a long pause.

"I'd try everything else in the world, first."

"And you won't go home?"

She clenched her hands.

"I tell you I can't go home!" Restraint for the moment left her.

"How can I go home—when I haven't any home to go to? When there isn't any place left for me?"

Hammond suddenly felt abashed. He kicked thoughtfully at the loose snow of a trail-side drift.

"And I guess that isn't any of my business," he said at last.

Jack had made the statement almost in self-rebuke. Insistence on knowing this girl's past, he felt, would be a rat's trick. At last he asked:

"You said you wanted me to help you. Do you need money?"

"No—I'll have what I've earned at the restaurant."

"That hasn't been much."

"Oh, I've had my meals." She spoke it eagerly. "And everybody's been good with tips."

Hammond knew it was a puny amount. Jeanne Towers looked up at him, her face illumined. The well-formed lips were slightly parted. There was an expression of desperation in face which he could not evade.

"What's most on your mind?" he asked.

"Dogs," she answered, as if in reply to the multi-toned raucousness

of the camp's howling. "They cost so much."

"They'll be worth even more to-morrow. I got an offer to-night for a team of mine. Four hundred dollars." She dropped her gaze, staring at her mittens.

"That's a lot of money."

"So I've been thinking. My partner put me in a hole. Told me first that he was going through light and to bring full supplies for both of us. Then I got here and found he'd taken enough to last until doomsday. So I've got that extra team."

"Yes, I know," the girl said. They had begun to walk again. "I saw it over at Siwash Jim's."

"Siwashes may not be pretty or clean, but they know dogs."

"It's a good-looking team. Except for the leader."

"Had to take what I could get. Say," he asked quickly, "what do you know about dogs?"

"I come from dog country," the girl said simply.

"Where?"

She hesitated. Then, "Is that essential?"

"I'm sorry." More than once in this conversation, Hammond had caught a hint of background; good use of English, modulation in tones as though she possessed a sense of value. Too, he had found a lack of brazenness, yet a quality of deep determination, almost of desperation. The causes he could only guess. At last he said, "Then you can drive dogs?"

"I used to drive them a lot—until a year or so ago."

(To Be Continued)

### Sure To Hold

Alliance Between France And England Has Sound Foundation

One point, reliable as the North Star, stands fixed among the fluctuating currents of European policy, and it is this point of stability that is stressed and sealed by the visit to France of the King and Queen of England. The pageantry Paris puts on to welcome the Royal visitors may be less splendour and spectacular than the imperial parade that Rome prepared for Hitler. It has less need to be. France does not have to exaggerate its strength and grandeur to impress the British sovereigns or to conceal such doubts and questions as lurk behind the emblazoned axis linking Rome and Berlin. Whatever happens, regardless of any conceivable shift of circumstance or any possible combination of other powers the Franco-British entente is the one alliance sure to hold.—New York Times.

### Salt Shortage

Spanish War Causes A Difficult Situation In Newfoundland

Refusal of Spanish Insurgent General Franco to allow a Russian steamship to enter the port of Cadiz has caused a difficult situation among Newfoundland fishermen.

The ship was chartered to bring more than 30,000 hogsheads of salt to St. John. Delay in bringing the salt added to the difficulties of the fishermen, already troubled with a shortage while codfish were reported in abundance along the Newfoundland and Labrador coasts.

The insurgents refused to allow the ships to enter port on the grounds she had carried war materials to the Government forces. A ship of British registry was engaged to carry the salt.

### Football And Boxing

The sport of boxing long has been regarded as one in which death is likely to come suddenly to one of the participants, but actually the mortality rate is not nearly so high as it is in football. In the last 15 years of the sport only 30 deaths have been attributed to fistie encounters. The number of fatalities in football is about 15 times as great.

"Did you hear my broadcast last night?"

"As a matter of fact, my radio broke down halfway through."

"Is that liable to happen often?"

"They don't guarantee it."

The chemical industry is practically depression proof, according to one chemist, because it is continually pioneering into new industrial lines.

Butter has just replaced margarine on the sailors' bread in the British Navy.

Has Been Banner Year

Gideon Society Distributed 81,000 Bibles In Last Twelve Months

During the past 12 months a casual reader of the news might conclude that the harsh voices of materiality echoed a world rushing headlong to its doom; rushing away from the spiritual sanctuaries of unselfish love. The world's clamor is strident. At times it may seem to drown the "still, small voice" of spiritual inspiration. Yet the past year, despite all its stridency, records distribution by the Gideon Society of 81,000 Bibles. This is a substantial increase. The yearly average over the last 30 years has been only 50,000. The Bibles have been placed beside hospital cots, in hotel rooms, in employment agencies, on school desks, in prison cells. The very materialism of the age, showing itself in pagan practices and a brazen disregard of human rights, is driving men and women to seek refuge. Millions seek it in temporary shelters. Other millions are turning to the Bible in the recognition that no terror or cruelty of this time, no dull load of unemployment or despair, but can be lightened and even healed by recourse to the practice of Bible truths. — Christian Science Monitor.

### New Respirator Mask

Aviation Equipment Designed By Mayo Scientists Is Success

Mayo clinic scientists said a new type of respirator mask, tried out in planes flying in the stratosphere, may some day serve as a substitute for oxygen tents now used in hospitals.

Dropping out of the sky after a non-stop flight from California, an airplane landed at Minneapolis with scientific data on oxygen mask equipment expected to make an important contribution to medical science.

For seven hours and 40 minutes the large transport plane of Northwest Airlines had flown from Los Angeles and approximately one-third of the time at an altitude of 31,000 feet in order to give the crew time to test the new masks.

Dr. W. R. Lovelace, Rochester, Minn., Mayo Foundation fellow and co-designer of the mask, said he was well pleased with the success of the tests.

### Sounds Like Tall Story

Negro residents of Mound Bayou, Miss., claimed the title of "the world's strongest baby" for four-year-old Sam Mitchell, Jr., who they describe as a second Joe Louis. The child carries a 24-pound sack of flour or two 10-pound gallon buckets of molasses with equal ease.

### LOCAL & GENERAL

George Royds visited his home here during the holiday weekend.

Mr. and Mrs. W. G. Liesemer and daughter Evelyn were vacationing at Banff over the holiday.

Tom Royds, Alf. Brusso and Ralph Hanson report a good time in Calgary.

Mr. and Mrs. Herman Hawkes spent the holidays at Water Valley and the Banff national park.

Mr. and Mrs. Ed Ford spent the Labor Day holidays in the Banff national park.

Mr. and Mrs. Harry Pearson and Mr. and Mrs. J. E. Gooder were weekend visitors to Banff.

Mr. and Mrs. Ernest LeClaire and family, of Edmonton, spent the holiday visiting relatives and friends here.

Mr. and Mrs. Charles Mortimer, Betty and Bobbie, motored in the National Park during the holiday taking in Banff and Radium.

Pete Miquelon, who has been relieving at different stations during the summer, will be back at his post at the local C.P.R. depot Monday.

Misses Annie Morton, Grace Ranton, Rena Mowers and Ethel Bruce motored to Banff and Lake Louise during the holidays.

Edward G. Robinson, noted for his gangster characterizations, turns comedian in "A Slight Case of Murder" at the movies this weekend, with Jane Bryan and strong cast.

Mr. and Mrs. George Sefton, of Airdrie, and Mr. and Mrs. Stanley Gill, of Calgary, were visitors with Mr. and Mrs. Bert Radford over the holiday weekend.

Misses Jo Booker, Eileen Geeson and Alma Shaw are Didsbury students who are enrolled at the Calgary Normal School, which opened for the term on Tuesday.

Mrs. Pauline Holbrook returned last week from a two weeks' visit at Vancouver and Victoria. While at the coast Mrs. Holbrook took a special course in beauty culture.

Dick Wallace, Charlie Geiger and J. A. McGhee took part in the Innisfail golf tournament on Sunday and Labor Day. They managed to bring home two prizes in the consolation events.

A mite-box to receive contributions to the Chinese Refugees' Fund has been placed in every Chinese restaurant in Alberta, as well as a subscription list for those who desire to give larger amounts. The work is a worthy one and has been carried on in Calgary by a joint committee of Canadian and Chinese citizens.

Mrs. Det Fulkert entertained at dinner on Sunday in honor of her father, Mr. Bill Moon, the occasion being his 25th wedding anniversary. Mr. Moon was recipient of a silver belt outfit presented by the family and relatives. Those present were: Mr. Bill Moon, Mrs. Det Fulkert, Mrs. Bob McGaffin, Riley, Frank, Bertha, Winnie, Bill and Royden Moon; Mrs. L. B. Fulkert, Mr. Det Fulkert, Mr. Bob McGaffin and Jimmie Nelson.

For the first time in Canada! "Neva-Wet" hosiery by Circle Bar improves resistance to perspiration, spots, snags, water stains.—Sold by J. V. Berscht & Sons.

Mr. and Mrs. Ed. Watkin spent their holiday at Gull Lake. They were accompanied by Mr. E. G. Ranton—who went to visit Mrs. Ranton and Dorothy, who have been spending their vacation at the lake.

Mr. and Mrs. Elmer Mack and daughter Gloria, of Nanton, were visitors here over the holiday with Mrs. C. Mack and other relatives. Elmer has been manager of the Nanton branch of Jenkins' Groceries for the last ten years.

Have you ever worn a pair of Berscht's work shoes. They are the kind that will give you good wear. Made with outside counters, solid leather soles, and they are ammonia proof. None others just as good for the price—\$3.95.

### Obituary.

Mrs. LEIF ERICKSON

On August 31st, 1938, occurred the death of Mrs. Leif Erickson at the Didsbury Hospital after a very brief illness.

Mary Jane Ellis was born in Colfax, Washington, on April 12th, 1904, and died at the age of 34 years. She was united in marriage to Mr. Leif Erickson on August 18th, 1928, and to the union were born two daughters, Gail, 8 years, and their infant daughter Joan, of 6 weeks.

In 1931 Mr. and Mrs. Erickson moved to Alberta and resided on a farm in the Bergen district. Here they made many friends who will keenly miss her.

The late Mrs. Erickson leaves to mourn their loss, a loving husband and two daughters; an aged father and mother in Washington; six brothers, Ralph, Walter, Elmer, Howard and Robert, all of Washington, and Ross, of Bergen; two sisters, Bessie, of Washington, and Edna, of Illinois. A large number of near-relatives and friends also mourn her passing.

The funeral service was conducted from the Bergen M.B.C. Church on September 4th by Rev. Oscar Snyder assisted by Rev. Earl Archer. Interment was made in the Bergen cemetery. The Durrer Funeral Home had charge of the funeral.

### The West Detour.

For the past week cars have been routed from Olds one half mile west and eight miles south on a detour to Didsbury while construction work is under way on the highway between Didsbury and Olds.

But one thing was overlooked by the Public Works Dept. The detour would have been better left without gravel, than to be covered with myriads of rocks and fine sand, which will take years to clear from the road. Inasmuch as this is a market road, care should have been taken that the gravel was screened at least to a two inch size. At the present time the gravel cover ranges from sand to 6 inch rocks.

During the marketing season it is highly probable that the rocks will be dangerous to truckers hauling wheat and may be the cause of a serious accident.—Olds Gazette.

Delicious Clover Honey For Sale at 50c per imperial quart. Please bring containers.—Mrs. Booker, (2)
